Price - SRP of US\$34.99 per bottle

Cognac Ferrand has launched an extension to its Citadelle gin range that has been aged using the solera process.

The French company claims it is the first gin to be aged in this way, and provides an alternative for classic cocktails such as the Martini and gin & tonic. The process involves putting new-made Citadelle into three different types of casks for two to five months.

The casks are ex-Cognac, ex-Pineau des Charente and American oak.
